

Henrique Lima

Objective: Software Development / Software Engineering Internship

Paulista, PE | +55 (81) 98367-3405 | henriquebl2000@gmail.com

linkedin.com/in/henriquebdl | github.com/HenriqueBL

PROFESSIONAL SUMMARY

Systems Analysis and Development student (4th semester), proactive and driven by technology. I have hands-on experience developing web applications, SQL databases and REST API integrations with Java and Python, plus process automation and data extraction (web scraping) with Selenium, Playwright and requests. Strong foundation in programming logic and OOP, focused on shipping quality code with AI-assisted development (Claude Code). Fluent English (exchange in the USA), fast learner with clear communication.

EDUCATION

Systems Analysis and Development — Estácio

Jan 2025 – Jun 2027 (expected)

In progress (4th semester)

Focus: Data Structures, Object-Oriented Programming (OOP), SQL Databases and Software Engineering.

High School — Exchange (USA)

2018 · 1 semester

Mt Ida High School (Arkansas) · Ganhe o Mundo Program (PGM)

Academic and cultural immersion in the United States; foundation of fluent English.

PROJECTS

Realtime API Watcher

Python, Requests, Threading, REST APIs

- Real-time API monitor for process automation and asynchronous data extraction, with low-latency polling.
- Architecture with concurrency control (threads), JWT authentication and resilience via retry and exponential backoff.

Todo API — Task Manager

Java 17, Spring Boot, JPA, H2, JUnit

- Complete REST API with CRUD operations, data validation and global error handling.
- Automated tests with JUnit to ensure the quality of the application's features.

Personal Portfolio

Next.js, TypeScript, Tailwind CSS

- Responsive web application focused on performance (SSG), SEO optimization and clean UI/UX.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS (OOP/Java foundation transferable to C#)

Automation & Data Extraction: Web Scraping, Selenium, Playwright, PyAutoGUI, Requests, Process Automation

Backend & Databases: REST APIs, Spring Boot, SQL Databases, JUnit

Frontend: React, Next.js, Tailwind CSS, Responsive Web Development

Tools & Productivity: Git, GitHub, VS Code, Claude Code, AI-Assisted Development, Prompt Engineering

LANGUAGES & COURSES

English: Fluent · Portuguese: Native

Java Course (54h) — Udemy (completed Feb 2026): language fundamentals, object-oriented programming and programming logic.
